LASER HAIR PROGRAM

What is it?

These programs are based on each clients needs but a typical program is as follows:
A 12-month program clinically proven to rejuvenate hair growth in more than 90 percent of the people who follow it.

- Helps reactivate hair re-growth
- Thickens thinning hair
- Treats male pattern baldness in both men and women
- Treats scalp conditions

WHAT IS INVOLVED?

Everything below is included and replaced as needed *throughout the 12-month program.

Laser Hair Therapy Laser: Class IIIA cosmetic laser. Stimulates scalp blood flow. Increases bioaugmentation and cellular synthesis. Removing harmful growth blocking DHT induced debris from the hair follicles. There are two twenty treatments per week throughout a recommended 12-month program.

Equalizing Detoxifying Shampoo: Natural chemical free, mild cleansing shampoo. Containing naturally occurring Niacin and Methyl Nicotinate to increase scalp blood flow, providing vital growth related nutrients to the hair follicles. Daily use provides a healthy environment for hair re-growth.

Live Enzyme Cleaner: Pharmaceutical grade, highly activated enzymes, to deep clean scalp pores. Removes nutrient clogging oils, sebum, fats, build up and harmful detergents from previous hair care products and DHT byproducts.

Chemical Free Conditioner Restores and protects the hair shaft. Protects against hair loss as well as promotes growth of healthy thick hair.

Topical Activator Solution: Stimulates the hair growth process. Removes the clogging nutrient choking DHT buildup from the hair follicle to allow new hair re-growth. Contains topical Minoxidil, a medically proven stimulator of new hair growth.
